

CLASSROOM NEWS

Week of September 23, 2019

WEEK AHEAD

Hello, families!

Happy first day of Fall! Last week, our class worked hard to transition quickly in the classroom. Each week, we will set a new goal for ourselves. Today, we agreed to work on consistently demonstrating hallway behavior when traveling anywhere as a class.

Academically, we are continuing a few items from last week and starting a few others. During reading, we will work in small groups, and we will use the site raz-kids.com to listen to readings. Students may access this site at home, if they'd like to listen to other stories on their own time. We will also kickoff our first science unit all about matter. We will discuss the scientific term *properties* and build with materials that meet various needs. In math, we are continuing to work on graphing, first with picture graphs then with bar graphs. Have a great week!

- Mrs. Mare

SPELLING

Coming Sep. 30...

Kicking off our matter unit-
What are solids,
liquids, and gases?
